

As a West Concord Green Thumbs member I am most interested the development of the rail trail. I attended the virtual meeting last Thursday and feel that the temporary routing fails to meet safety issues and leaves the pedestrian trails quite small and difficult to maneuver for people with little kids, dog walkers, people with strollers,etc to navigate. In fact, most of the permanent plans have the trail dominating the area and greatly reducing the space for quieter activities!

I don't have a "fix" this problem but did want to express my concern.

Respectfully,

Eileen Furth
