

WATER & SEWER CONTRACTORS LIST

The following contractors have obtained The Town of Concord's Drain Layers License. If you have specific questions about the process or the design of water or sewer service for your property, we recommend that you speak first to one of the licensed Drain Layers listed

If you are a Drain Layer and hold an active license with the Town of Concord but do not see your name on this list, please call (978) 318-3250 to speak to a member of our Water & Sewer Division.

Licensed Drain Layer Information

What makes a contractor a License Drain Layer in Concord?

To be eligible, a contractor must A.) Declare prior experience in performing water or sewer service installation work, B.) Provide the Town of Concord (Town) with a Certificate of Insurance, and C.) Receive training from the Town on service application procedures and associated design and construction standards and specifications.

If you are interested in using a contractor who is not on the list, they may contact Concord Public Works Water & Sewer Division for details on applying for a license. As long as they have experience doing this type of work, the process to be licensed normally takes about three weeks.

Owner Responsible for Securing Competitive Pricing

We recommend that you obtain at least 3 quotations to ensure competitive pricing. Since the same contractor can decommission your septic system at the same the service connection is made to the sewer system, we recommend that you ask for the price of that work to be included in the price for laying the sewer line and creating the sewer connection.

Owner/Contractor Agreement

It remains your responsibility to get an agreement with a contractor that will protect your interests and satisfy your needs with respect to the contractor work, responsibility and responsiveness. While a Town inspector will be present to oversee service installation work, the Town cannot recommend any one contractor and cannot guarantee the quality or performance of work as it relates to private property.

Contractor Feedback

The Licensed Drain Layers list, maintained by the Town is routinely updated. Although the Town cannot accept any liability or responsibility for service agreements made between a private contractor and a property owner, we are interested to know if you experience any difficulties while working with a License Drain Layer. If so, please contact the Water & Sewer Division directly at (978) 318-3250 to report your concern.
